DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Rejections not maintained are withdrawn.

Claim Rejections - 35 USC § 112

3. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The Examiner notes that while the claims are substantially amended, ~~the~~ many claims are still replete with vague and indefinite recitations. The Examiner respectfully suggests that further clarification is necessary. For example:

In claim 1, line 4, the phrase "laminated and said adhesive layer is to be applied to an article" is vague and indefinite, i.e., is the article part of the lamination?

In claim 3, line 2, the structural relation of the adhesive layer in the label is still vague and indefinite, i.e., the exact structural relation of the adhesive layer and adhesive coating is confusing.

Response to Amendment

4. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicants' admission in view of Tanimura et al. (US 6065701), substantially for the

reasons set forth in section 5 of Paper No. 5, together with the following additional observations.

With respect to Applicants' Response arguing that Tanimura does not teach or suggest embedding electronic components in an adhesive layer (Response, page 6, bottom paragraph), the Examiner notes that Tanimura clearly illustrates in Fig. 2 that the adhesive layer (15) completely covers the electronic components, i.e., the electronic components are fully covered or embedded by adhesive layer, Applicants' argument to the contrary notwithstanding.

With respect to Applicants' argument that Tanimura does not teach or suggest the use of pressure sensitive adhesive material for "both faces adhesive material" layer (Response, page 7, top paragraph), the Examiner notes that it is believed that the "both faces adhesive material" layer is in fact a double-sided pressure sensitive adhesive layer is either inherently disclosed, or an obvious selection to one of ordinary skill in the art, as evidenced in Fig. 3 that the cassette label (1) is adhered to a depression (54) after the exfoliative paper (18) is peeled off (column 4, lines 37-42), and it is well known and conventional that a pressure sensitive adhesive is used to form a cassette label.

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1771

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor S Chang whose telephone number is 703-605-4296. The examiner can normally be reached on 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel H Morris can be reached on 703-308-2414.
